Microbiology Today is the Microbiology Society's membership magazine. Presented in a colourful and stylish layout, the lively range of features and articles – aimed at both the specialist and the general reader – provides a valuable resource for anyone wishing to know more about current matters and research in microbiology. The content is carefully balanced to meet the needs of all Society members, as well as providing an informative and enjoyable broad-interest magazine for all stakeholders, including parliamentarians and policy-makers. Today's microbiologists are very specialised, but appreciate being able to keep up with other areas of their subject through the themed feature articles in each issue. Topics are chosen to reflect every field in microbiology.

READERSHIP PROFILE

Universities (research and teaching)	52%
Medicine and healthcare	20%
Government and non-commercial	13%
Industry	12%
Other	3%

Our readers work in key areas of microbiology, including **bacteriology, virology, parasitology, biotechnology, mycology, environmental microbiology, biomedicine, genetics** and the expanding field of **genomics, proteomics, cell and molecular biology**.

The readership ranges from **applied scientists, clinical scientists** and **senior managers**, through to **researchers, principle investigators** and **lecturers** to **postgraduate** and **undergraduate** students. Society members control the purchase of laboratory equipment and computers, consumables and scientific literature.

Microbiology Today is also distributed to around **100 parliamentarians, policy-makers** and **journalists**.

REGULAR FEATURES

- Topical themed articles.
- Feature articles on a wide range of topics, including publishing, policy, career advice and public engagement.
- Previews of future Society Conferences and Focused Meetings.
