Sustainability Committee

1. Terms of Reference

Purpose: Reporting to Council, the Sustainability Committee is responsible for developing the future leadership of the Society and for ensuring the long-term viability of our operations to support the Society’s three main strategic objectives:

1. We will enable our members to strengthen their existing relationships and gain access to new communities, unlocking the potential for knowledge exchange.
2. We will advance understanding of microbiology and champion the contribution made by microbiology, our members and their work in addressing global challenges.
3. We will reinforce the Society’s long-term sustainability and resilience by diversifying income streams, increasing efficiency and ensuring robust governance.

The Committee will provide advice and expertise to Council and will be specifically responsible for overseeing the delivery of strategic objective three. The Committee will work with relevant working groups and staff to ensure that activities delivered are in line with budget. The Society is committed to creating an inclusive culture that supports equality and diversity and fully reflects both its membership and the global microbiology community. The Society seeks to actively encourage all practices that reflect a diverse society. To address this, the Society will ensure that equality of gender, career stage, ethnicity and disability are appropriately embedded and prioritised across the Society’s structure and activities. Although not similarly embedded at this time, the Society also considers equality of the remaining protected characteristics to be important.

2. Duties

The Sustainability Committee will advise, oversee and support the implementation of the following:

- Increase the emphasis on placing members at the heart of Society activities and growing future leaders, including:
  - providing opportunities for professional development for members, for example through the provision of grants, networking, or skills enhancement, and
  - offering a range of members-only grant schemes to support professional development and promote microbiology as a career, administering the awards through fair and transparent processes in line with the Society’s policy on Equality, Diversity and Inclusion.
- Proactively support member engagement at the Society through the development of member engagement activities and wider promotion of clear member benefits, including identifying areas of concern in recruitment and retention member data and making recommendations for improvement.
- Work with relevant staff members and external bodies as needed to devise a professional development programme that is relevant for Society staff, both to encourage the next generation of staff leaders and to enhance the reputation of the Society as an employer.
- Working with relevant Committees and staff, increase opportunities for generating income from a range of commercial and philanthropic sources.
- Working with relevant Committees and staff, identify opportunities to maximise cost savings and efficiencies.
• Ensure the external environment is effectively monitored by staff and reported to the relevant Committees, so that changes that could affect the Society’s strategic direction and/or activities are identified and acted on.
• Ensure there is close collaboration with other Committees and organisations on areas of common interest.
• Ensure relevant advice and recommendations are properly reported to Council.

3. Meeting schedule

The Committee will meet twice a year in February and October. The October meeting will be held jointly between all three of the Society’s Strategic Committees. Between the February meeting and June, the two Co-chairs from each of the activity Committees and the Chair of the Early Career Microbiologists’ Forum Executive Committee under the Chairship of the General Secretary, will be required to report back on their respective Committees, feed into budget proposals and produce a single Equality Diversity and Inclusion report for consideration at the July meeting of Council.

Between October and December, the two Co-chairs from each activity Committee, and the Chair of the Early Career Microbiologists’ Forum Executive Committee, under the Chairship of the General Secretary, will be required to present an annual report of Committee business. In addition, the Committee will transact its business between meetings by email and other communications to ensure sufficient reporting mechanisms to Council.

4. Membership

The membership requires a balanced portfolio of skills and knowledge to be able to fully support and engage with the remit of the Committee. The Committee comprises of:

• Two Co-chairs; ex officio members of Council.
• A Chair-Elect; sought from the membership by an open call for expressions of interest and approved by Council at least a year before the end of the current Chair’s term (the Chair-Elect does not have to be a current member of the Committee).
• One elected member of Council; this may reshuffle among the Elected Members of Council each year.
• Up to 11 members elected from the membership of the Society; nominations and elections are sought from the membership annually.
• One representative from the Early Career Microbiologists’ Forum Executive Committee, who serves for two years.
• One (or more) co-opted external professionals with relevant expertise; an important role of co-opted members is to provide constructive challenge.
• Ad hoc advisors can be requested to attend certain meetings to address specific knowledge requirements or assist in certain projects.

Unless otherwise stated, the term of office for all positions is three years. If a current member of the Committee is nominated as Chair-Elect, their term will extend accordingly.

Quorum: One Chair and seven members of the Committee must be present at any of its meetings to make the proceedings of that meeting valid.

The Committee is supported by the (appropriate staff member TBC). Other members of staff attend meetings as appropriate.
